

# Building Wisconsin Together®

## EXTERNSHIP DAYS WITH WISCONSIN OPERATING ENGINEERS

### Over 800 students expected at Externship Days on November 8-9th

The Coloma Training Center is gearing up to host over 800 students, educators and parents on November 8-9th. The Externship Day is an important opportunity for students, parents, and educators to learn about the rewarding career opportunity of being an Operating Engineer.

This event requires many volunteers - apprentices, operators and contractors. Thank you to Boldt, Cullen, Walbec Group, and Integrity Grading & Excavating for committing to participate in the event.

There is still time for individuals to register. If you know a student that would benefit from this exploration, please share the flyer below.
